Judging Big Air Discipline

Judging procedure

- The general judging rules are located in Chapter 21 of the GKA Kite World Tour Rulebook 2022.
- Judges shall award each competitor's trick scores on a scale from 0.1 to 10.0, broken into one-hundreds increments (e.g 6.44).
- An overall impression score may be used in addition to the trick scores counting towards the final heat result. Criteria of variety, "wow" factor, smoothness, innovation, tricks landed vs crashes, and commitment impact the Overall Impression score. The points awarded to the Overall Impression score counting towards the final result per competitor during a heat will be announced by the Head Judge and posted in the Official Notice Board at least thirty (30) minutes before the start of the heat.
- The scores of the respective competitors shall be tabulated together to determine the winner: highest points wins.
- The maximum number of trick attempts and the trick scores counting towards the final result per competitor during a heat will be announced by the Head Judge and posted in the Official Notice Board at least thirty (30) minutes before the start of the heat.

Ties in Big Air Discipline heats

- In case of tie in the Big Air format, it will be broken in favor of the competitor with the highest total trick score, excluding the Overall Impression score if there is any. If a tie remains between two or more competitors, it will be broken in favor of the competitor with the highest single score. If a tie remains between two or more competitors, each competitor's individual scores counting towards the final score shall be listed in order of best to worst, and at the first point where there is a difference the tie shall be broken in favor of the competitor with the best individual score.

Big Air Trick categories

- The tricks repertoire has been broken down in a number of categories. The list of tricks included by category is not extensive, and not limited to the described tricks in appendix D but gives an indication about how different tricks are being categorized by the judges. The Head Judge has the final say when categorizing a new trick.
- In order to bring the variety criteria into effect, if a trick is repeated or if it is an evolution of the same trick (i.e. added rotation), only the highest score from those will count towards the final heat score from each competitor.

Judging Criteria

- Judging Criteria are applied to score the quality of the execution of each individual trick. Each judge analyse the following major elements when scoring a trick:
 1. Height and amplitude – The combination of height and amplitude of the tricks completed during the heat. As the wind conditions increase, this aspect will exponentially become more and more into consideration, but only when the height and amplitude are achieved along with risk factor and technical difficulty.
 2. Technical Difficulty – The technical difficulty of tricks completed during the heat.
 3. Commitment and Risk Factor – Pushing the limits under control will increase the chances of winning the heat. The Risk factor is the commitment of the competitor and physical challenge during the execution, duration of the critical moment, and energy on the execution.
 4. Other judging criteria such as variety, “wow” factor, smoothness, innovation, tricks landed vs crashes, will affect the overall impression.
