Scoring - Kitesurf & Freestyle Discipline

Wave:

The maximum number of waves ridden attempts per competitor during a heat will be announced by the Head Judge and posted in the Official Notice Board at least thirty (30) minutes before the start of the heat.

Each Wave ridden is scored from 0.1 to 10.0 (ten), broken into one-tenth increments (e.g 6.4).

(iii) The following scale may be used to describe a wave ridden that is scored:

0-1.9 = Poor. 2.0-3.9 = Fair. 4.0-5.9= Average. 6.0-7.9 = Good. 8.0-10.0 = Excellent.

Judging Criteria are applied to score individual waves ridden. Each judge analyses the following major elements when scoring a ride:

- Commitment.
- Degree of difficulty.
- Innovative and progressive manoeuvres.
- Combination of major manoeuvres.
- Variety of manoeuvres.
- Speed, power, and flow

The number of waves ridden from each competitor towards the result shall be decided by the Head Judge in consultation with the Riders Representative and posted in the Official Notice Board at least thirty (30) minutes before the start of the heat.

If a judge misses a wave ride, or part of the wave ride, they should place an "M" and that score will be given points equal to the average to the nearest tenth of a point (0.05 to be rounded upward) of the other judges' scores.

The Head Judge may re- run the heat according to rule 22.1.4, if all judges miss a wave ridden and there is strong evidence that the wave ridden was missed by all the judges and this wave ridden had a scoring potential that may change the result.

It's important to note that the emphasis of certain elements is contingent. upon the location and the conditions on the day, as well as changes of conditions during the day. Competitors must combine the major key elements to be awarded scores in the excellent range.

Strapless Freestyle:

The competition area shall be defined in the Sailing Instructions or in the way indicated in the Official Notice Board at least fifteen (15) minutes before the start of the heat. A diagram is recommended. Competitors shall be scored while being in the designated competition area. Whether a competitor is in or out of the competition area, will be at the discretion of the senior judge on the relevant panel and the Head Judge.

Overall Impression Scoring

There is no limitation of a maximum number of trick attempts per heat. Judges will not assign numerical values to each trick. They will have a shorthand notation for taking brief notes of the jumps performed on each tack during the heat. They will also write a final score based on the following categories:

- 10 points Technical Difficulty: The technical difficulty and height of a trick landed during the heat. As the wind conditions increase, this aspect will exponentially become more and more into consideration, but only when the height is achieved along with risk factor and technical difficulty.
- 10 points Variety: Variety of tricks completed during the heat on both tacks. Repetition of tricks on the same tack will decrease the chances of winning the heat. Repetition of tricks on both tacks (switch tricks) will increase the chances of winning the heat.
- 10 points Overall impression: Considering style, quality vs quantity, innovation, and "wow" factor.

Trick by trick Scoring

- There is a limitation of a maximum of 12 trick attempts per heat.
- Only the best 5 tricks with the highest individual scores from different trick categories will count towards the final score from each competitor. One per category, except BOARD OFF and KITE LOOP categories, that can count two.
- The amount of trick attempt to count towards the final score will be announced by the Head Judge and posted in the Official Notice Board at least thirty (30) minutes before the start of the heat.
- If a competitor "butt checks" when landing the trick and doesn't lose the board, the judges will still give some credit to the trick. It's at the discretion of each judge to consider if it's a crash or a butt check and to consider how much credit they will give to the trick.
- The credit given to butt checked trick landings is directly related to the risk factor involved in the execution of the trick. For tricks with a high degree of risk factor, judges won't deduct points for a butt-checked landing.
- A trick is a crash only if most of the judges consider it as a crash. If the minority of the judges consider a trick as a crash, those crashes will be withdrawn, and the judges will reconsider the trick in the other scoring categories.
- If a judge misses a trick, he should place a "M" and he must consult to the Head Judge before giving the final score of the heat.
- The Head Judge may re-run the heat if all judges miss a trick and there is strong evidence that the trick was missed by all the judges and this trick may change the result.
- Judges may not change their scores. If there are any mistake the judge should have the Head Judge, make the correction for them.
- In case of tie, it will be broken in favour of the competitor with the highest single score. If a tie remains between two or more competitors, each competitor's individual scores shall be listed in order of best to worst, even if some of them are excluded scores, and at the first point where there is a difference the tie shall be broken in favour of the competitor with the best individual score.

Trick categories

The tricks repertoire has been broken down into the following tricks families. The list of tricks included by family is not extensive, and not limited to the described tricks below but gives an indication about how different tricks are being categorized by the judges. The Head Judge has the final say when categorizing a new trick.

To bring the variety criteria into effect, only the highest score per trick family will count towards the final heat score from each competitor.

Judging Criteria

• Judges will assign numerical values to each trick attempt based on the following judging criteria's:

- Height and amplitude The combination of height and amplitude of the tricks completed during the heat. As the wind conditions increase, this aspect will exponentially become more and more into consideration, but only when the height and amplitude are achieved along with risk factor and technical difficulty.
- Technical Difficulty The technical difficulty of tricks completed during the heat. A grabbed trick will be rewarded with a higher score than a non-grabbed trick within this criterion, depending on the quality of the execution.
- Power The power during the execution of the tricks. Power will be considered as a combination of speed into the trick to pop and speed out during the landing, height, and amplitude during the trick.
- Risk factor Is directly linked to the power, height, amplitude, and technical difficulty of the jump, but also to the commitment of the competitor and physical challenge during the execution, duration of the critical moment, and energy on the execution.
- Smoothness Smoothness and fluidity during the execution and landing of tricks completed during the heat.
- Innovation Tricks that have never been landed in competition before.
